

## *Student Success Portfolio Program*

### October Discussion Starters

## ***School-related Activities***

School activities offer students opportunities to develop many leadership and teamwork skills. Below are some questions to start the discussion with your student about their school-related activity artifacts to be placed in their portfolios.

1. Create an ongoing listing of all your different activities in which you participate at school.
2. Include your activities in all aspects of your schooling such as music performances, drama productions, sports teams, clubs you belong to, Student Council and others unique to your experiences.
3. Is your participation for a long term such as spread over your school year or is it for a single event that is being organized?
4. Are you a participant in your activities or do you play a leadership role? Have you been a Chair of a committee, the President of your Student Council, a captain or peer coach for a sports team, the debate team captain or any other leadership role in your activities?
5. Have you initiated any special school activities or the creation of any clubs?
6. Have you been a school representative for any special events division wide or provincially in your high school years?
7. What artifacts can you collect to place in your portfolio witnessing your participation in these activities?
